The solution is activated from an Icon in Teams. Giving you easy access to search and an overview of status on presence and calendar.

Click on e-mail or phone number to start a conversation or an e-mail.

If you need to find a person in e.g., finance you can search on department or keywords provided.

Unified Directory is a WEB application that embeds into teams and shows up as an Icon, it cannot be easier. It collects information from Teams and Office 365, it used the same security model as Teams to ensure that unauthorized access is not possible.

You can click on a person to see the detail level, here you can see the calendar in detail or initiate a search by clicking on underlined fields.

The detail view is configured to your needs and contains the information relevant for your organization.

If you need to find a substitute you can also click on department and see who is in same department and it available right now.

With the links you can also navigate around in the organization as pleased.
